

Find the volume of the paraboloid:

Find the volume of the paraboloid:

7/8/25

$$\Delta y = \frac{b-a}{n} = \frac{H}{n}$$

$$x^2 = y$$
$$\Rightarrow x = \pm \sqrt{y}$$

$$r = \sqrt{y}$$

Volume of  $n$  cylinders:  $\sum_{i=1}^n \pi r_i^2 h$

$$\Rightarrow \text{Volume} = \lim_{n \rightarrow \infty} \sum_{i=1}^n \pi r_i^2 h$$
$$= \pi \lim_{n \rightarrow \infty} \sum_{i=1}^n r_i^2 \Delta y$$

$$= \pi \int_0^H r^2 dy$$

$$= \pi \int_0^H y dy$$

$$= \frac{\pi}{2} y^2 \Big|_0^H$$

$$= \frac{\pi}{2} H^2$$

$$c_i = (i-1) \Delta y$$

$$f(c_i) = r_i = \sqrt{(i-1) \Delta y}$$

$$h = \Delta y$$
